**SUBJECT: Intermittent Delays at Guntersville Main Lock, Tennessee River Mile 349.0**

The US Army Corps of Engineers will be conducting repairs to the filling culvert valves & tow haulage unit on the main lock chamber at Guntersville Main Lock beginning on June 1, 2009. At times, these repairs will require Corps floating plant to be temporarily moored in the lock chamber during daylight hours. It is anticipated that these closures will not exceed ten hours in length. During these periods, the main chamber will be closed to navigation traffic. The haulage unit will be out of operation during this work. Therefore, self help should be utilized. The repairs are scheduled to be completed on June 25, 2009.

The auxiliary lock (360' x 60') will be available to pass traffic. For further information, please contact Guntersville Lock at 256-582-3263 by phone or marine radio channel 16.

FOR THE DISTRICT ENGINEER:

JEFFREY D. ROSS  
Chief, Navigation Branch  
Operations Division

O.T.
